

## Risk Disclosure

The following statement does not disclose all investments associated with risk and is intended to inform users that Forex trading may result in substantial loss of funds and/or total loss of funds in excess of their initial margin funds, for which should only be done with risk capital. Risk capital is defined as funds that are not necessary for the survival or well-being of the user.

If you do not fully understand the risks involved in forex trading, do not trade. ALPHA FINANCE LAB strongly recommends that any user considering trading forex or commodities first carefully read this disclaimer and understand the risks and losses inherent in forex trading.

It is your responsibility to carefully consider your investments before committing funds to forex trading. Before considering entering into any transaction with ALPHA FINANCE LAB, you should carefully consider whether such trading is appropriate in light of your own financial position and investment objectives. Forex trading is commonly known as a double-edged sword, as the risks or losses involved are equivalent to the potential for profit.

Placing contingent orders, such as stop-loss or stop-limit orders, will not necessarily limit losses to the anticipated amounts. Market conditions may make it impossible to execute such orders. You may be required at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, your position may be liquidated. You will remain responsible for any resulting shortfall in your account. You should therefore carefully consider whether such trading is suitable in light of your own financial position and investment objectives.

Certain market conditions may make it difficult or impossible to execute orders at a stipulated price.

A margin position can be as risky as a simple long (or short) position and can be more complex.

The high degree of leverage that can be obtained in spot forex trading due to small margin requirements can work both against you and for you. Using leverage can lead to large profits and losses.

The insolvency of ALPHA FINANCE LAB or a bank or broker used by ALPHA FINANCE LAB to effect transactions on its behalf may result in your positions being closed against your wishes.

The Client is advised that transactions carried out through ALPHA FINANCE LAB's trading services may be speculative in nature. They can lead to large losses in a relatively short period of time, which cannot be predicted, and which may lead to a complete loss of funds deposited with ALPHA FINANCE LAB. These losses may be attributed to adverse market movements, the accumulation of positions, or the accumulation of commissions and fees related to transactions.

The Client's attention is expressly drawn to the fact that the nature of the transactions executed under his instructions by ALPHA FINANCE LAB may not be easily achievable in the case of a currency traded so irregularly or infrequently that he cannot be sure that a price will be quoted. at all times or that it may be difficult to transact at a quotable price due to the absence of a counterparty.

The forex trading you are doing is not done on an exchange. ALPHA FINANCE LAB may act as a counterparty in these transactions and may therefore act as a buyer when selling and as a seller when buying. As a result, ALPHA FINANCE LAB's interests may conflict with yours, unless otherwise specified in your written agreement or other written documents. ALPHA FINANCE LAB sets the prices at which it offers to trade with you; The prices offered by ALPHA FINANCE LAB may not be the best prices available and ALPHA FINANCE LAB may offer different prices to different Clients. Additionally, since ALPHA FINANCE LAB may act as a buyer or seller in the transaction, you should carefully evaluate any trading recommendations you receive from ALPHA FINANCE LAB or any of its supervisors.
